Date: 28 Sep 2026

Background: ☐ Non-technical ☒ Technical / research student ☐ Other: _____

Used a similar health or data app before? ☐ Yes ☒ No

T1 — Aura Screen (phone)

Success: reads their heart rate on the report

Create an account, finish setting up your record, start a contactless scan, then open your session report and tell us your heart rate.

Outcome: ☒ Completed ☐ Completed with help ☐ Failed

Debrief

Most confusing moment:

Thought this was just for research -- didn't realize there was an

app built on this data, like Aura Screening.

What would you change first?

Mention on the site that there are apps built using this data,

like Aura Screening, so people know it's not just research.
